Embassy of Algeria
Dar es Salaam

سفارة الجزائر
بدار السلام

REF: 42/DAR/EMB/2026

The Embassy of the People's Democratic Republic of Algeria in Dar es Salaam presents its compliments to the Ministry of Foreign Affairs and East African Cooperation of the United Republic of Tanzania and has the honour to inform that the Algerian Ministry of Higher Education and Scientific Research has officially launched the second edition of the digital platform "*Study in Algeria*", intended for international students wishing to pursue higher education in Algeria at the Bachelor's, Master's and Doctoral levels.

Applications may be submitted online no later than **30 June 2026**, via the following link: <https://studyinalgeria.dz>.

This initiative forms part of the implementation of the provisions of the Presidential Decree No. 25-82 of February 20th, 2025, which sets out the terms and conditions governing the admission of foreign students to Algerian higher education and training institutions.

The *study in Algeria* platform provides comprehensive information on Algeria's higher education and training system, including available academic programmes for international students, admission procedures, tuition fees and related practical details.

In this regard, the Embassy wishes to recall that higher education in Algeria is characterised by a wide network of universities and a broad range of academic specializations, supported by modern infrastructure and reinforced by international partnerships that contribute to the global recognition of Algerian degrees. Academic programmes are delivered in Arabic, French and English, with particular emphasis on advanced scientific and technological disciplines, notably within specialized university hubs offering instruction in English.

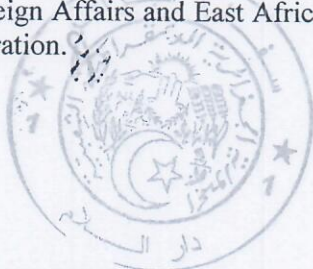

Algeria further offers a welcoming academic environment, relatively low living costs, affordable registration fees and facilitated visa procedures, making it an increasingly attractive destination for international students.

The Embassy would also highly appreciate if the esteemed Ministry could kindly bring the content of the Note to the attention of the relevant higher education and training institutions in the United Republic of Tanzania.

An overview outlining the advantages of studying in Algeria is enclosed herewith for ease of reference.

The Embassy of the People's Democratic Republic of Algeria avails itself of this opportunity to renew to the Ministry of Foreign Affairs and East African Cooperation of the United Republic of Tanzania the assurances of its highest consideration.

Dar es Salaam, February 16th, 2026

Ministry of Foreign Affairs &
East African Cooperation
(Kind attn: Permanent Secretary)
Government of the United Republic of Tanzania
Makola Street P.O.Box 2933 Dodoma

Why study in Algeria ?

A Scientific Hub, Natural Biodiversity, Cultural Wealth, and Human Generosity

Located in North Africa, Algeria consists of 58 provinces and has 1,200 km of Mediterranean coastline, as well as a diverse landscape featuring plains, high plateaus, mountain ranges, and a vast desert covering 2 million km².

The official languages are Arabic and Tamazight. Other languages such as French and English are also spoken. The predominantly youthful Algerian population counts 46.63 million of mostly Muslim inhabitants of diverse cultural backgrounds, known for their passion for sports and artistic expressions, rich culinary traditions, immense generosity, lively humor, and strong national pride

At a crossroads of Arab, African and Mediterranean cultures, Algeria is home to numerous Numidian and Roman sites. There are seven Algerian landmarks and monuments listed as UNESCO World Heritage Sites:

- Tassili n'Ajjer, (in Tamanrasset and Illizi provinces)
- Djemila (in Sétif province)
- The M'zab Valley (in Ghardaïa province)
- The Casbah (in Algiers), the Kalaa of Beni Hammad (in M'sila province), Timgad (in Batna province), and Cherrhell (in Tipaza province)

Each Algerian city has its own distinct musical, culinary, and traditional attire style. Festivals are held throughout the year to celebrate historical milestones, religious holidays, and cultural events.

The University Network in Algeria

-The Algerian University network comprises 117 higher education institutions across 48 of the 58 provinces.

-Closely correlated to the socio-economic local fabric, this university network, consists of 55 universities, 9 university centers, 40 national higher schools, and 13 higher teacher-training colleges.

-Since 1962, Algerian universities have trained over 65,000 international students from 62 countries, particularly, in the fields of medical sciences, technology, and social and human sciences.

The Algerian Higher Education System

Training offers in Algeria allow for the development of a study path tailored specifically to the needs and evolution of the student's study project.

Higher Education Institutions offer students several access paths to higher education:

-Universities: Offer trainings leading to a Licence/Bachelor's degree (3 years), Master's degree (5 years), Integrated Bachelor-Master degree (5 years), Engineering degrees (5 years), and Medical Sciences Degrees [including: Medicine (7 years), Dental Medicine and Pharmacy (6 years), Veterinary Science (6 years)], and Architecture (5 years) as well as Phd Degrees in various disciplines (8 years).

-University Centers: Provide training for the Bachelor's Degree (3 years) and Master's degree (5 years), including Integrated Bachelor-Master programs (5 years), as well as Phd Degree (8 years).

-Higher National Schools: They are organized in field specialisms and offer a five-year training program, consisting of a two-year foundation course, followed by a three-year specialization. After successful completion of the initial two years of training, access to the specialization phase is contingent upon succeeding at the competitive entrance exam organized by the school.

Study Cycles and Awarded Degrees

Algerian universities offer general academic programs based on the LMD system structured around three academic cycles.

-Bachelor's Degree : requires three years of higher education. The programs are based on the core fundamentals of each specialism.

-Master's Degree : A two-year program, which provides students with advanced knowledge in a specific field. Students must complete a final dissertation defended in a public viva voce examination.

-PhD Degree: involves three years of academic research, during which candidates prepare and submit a PhD thesis, defended in a public viva voce examination.

Fields of Training

The fields of Training in Algeria include:

- Natural and Life Sciences
- Science and Technology
- Health Sciences
- Material Sciences
- Mathematics and Computer Science
- Economics, Commercial and Management Sciences
- Earth and Universe Sciences
- Law and Political Science
- Human and Social Sciences
- Arts
- Arabic Language and Literature
- Amazigh Language and Culture
- Literature and Foreign Languages
- Architecture, Urban Planning, and Urban Professions
- Sciences and Techniques of Physical and Sports Activities

Scientific Infrastructures

-Moodle: This is an educational platform which provides access to courses, tutorials, exercises, and assignments. An account is assigned to each student upon enrollment at the university.

-Progres: This is a digital platform used by the Ministry of Higher Education and Scientific Research designed to enhance services for the university community. It enables the academic monitoring of students, from registration and right through their educational path. Link: <https://www.mesrs.dz/index.php/fr/progres/>

-IBTIKAR: A platform created by the General Directorate of Scientific Research and Technological Development, designed to support doctoral students in conducting their research work for the preparation of their theses. For more information, visit www.ibtikar.dgrsdtdz or download the Ibtikar mobile application from Google Play.

-SNDL: is a portal providing access to national and international electronic resources online. It offers access to a vast and diverse collection of electronic documentation covering all fields of education and scientific research. Link: <https://www.sndl.cerist.dz/>

-ASJP: This is an electronic publishing platform for Algerian scientific journals managed by CERIST. Link: <https://asjp.cerist.dz/>

-BiblioUniv Algérie: A documentary portal open to all university stakeholders, including students, researchers, and library administrators, who wish to promote new approaches and innovative organizational and operational models for university libraries. Link: <https://www.bibliouniv.cerist.dz/>

Languages of Instruction in Algeria

The languages of instruction in Algeria are **Arabic, French, and English**, depending on the chosen academic fields and specialisms chosen.

Students who do not master the language of instruction undergo an intensive training period at the Intensive Language Teaching Centers (CEIL) affiliated to their higher education institutions.

Tuition Fees & University Services

Tuition Fees for the 2025-2026 Academic Year

Tuition fees in Algeria are highly affordable compared to those in many other countries. This affordability allows international students to pursue quality higher education without facing significant financial pressure. Algerian universities offer accessible academic opportunities, making the country an appealing destination for students seeking both excellence and affordability. For more details, please refer to the attached file (Training fees file).

Bank Details for Payment of Tuition Fees

Registration fees shall be paid to the Bank of Algeria under the BIC code: **BLAGDZAL**, using the following bank details:

Correspondent Bank: CITIBANK N.A, New York, NY, USA

BIC Code: CITIUS33

Account Number: 10 963 767

Beneficiary: [Name of the University Establishment]

IMPORTANT NOTES:

- Payment may be made after obtaining the visa.
- Students who are exempt from visa requirements or who already hold a visa may proceed with the payment immediately.
- The payment receipt must be uploaded in **PDF format** in the **Academic Documents** section.
- The name of the University Establishment must be clearly stated on the receipt.

University services and Student Life

Accommodation

Student accommodation is provided by the National Office for University Services.

The Algerian university services network consists of 66 university services directorates and 466 university residences spread across the country, accommodating more than 400,000 students, including international students.

Catering

University restaurants offer students the opportunity to have nutritious and balanced meals, including breakfast, lunch, and dinner.

Transportation

Your student card give you access to university transportation services, ensuring shuttle services between university residences and higher education institutions (round trips). The mobile application, MyBus, provides students with all the necessary information, including bus schedules, stops, and routes in each university city.

A mobile version of the application is available for students.

Health Coverage

Students have access to health care services within their institutions and university residences.

Medical teams composed of general practitioners, dental surgeons, nurses are equipped with all the necessary medical facilities. These teams provide medical care for all students during the academic year.

Leisure Activities

In collaboration with students' organizations and scientific clubs, the universities regularly organize scientific, cultural, tourist and sports activities for the benefit of all students.

University Holidays

During their academic year, students enjoy university holidays at the end of their semesters and have Winter, Spring and Summer breaks.

Training fees for the 2025–2026 academic year
